

	Equipment :		Loss Type :	Defect loss							KAIZEN IDEA SHEET
	Department :	SIC	Result :	N	P	Q	C	D	S	M	
	Cell :	SIC	Type :								
Unit Name : Minda Stoneridge Intruments Ltd, Pune			Operation : Moulding								
Kaizen Theme: How to increase productivity & avoid rejection due to Improper threads in			Idea : Used pneumatic gun instead of alen key to remove the thread making insert								
Problem / Present Status		Counter Measure			Benchmark :						
Thread making insert removed by using alen Key		Used pneumatic gun to removed the thread making insert			Target :		Zero				
					Start :		25/05/2015		Finished :		29/05/2015
					Note :						
					Team Members :

Why Why Analysis :		Result :			Kaizen Sustenance :						
W1 : Why How to increase productivity & avoid rejection due to Improper threads in ? A1 : Hex Nut rejected W2 : Why Hex Nut rejected ? A2 : NG threading W3 : Why NG threading ? A3 : Thread making insert removed by using alen key W4 : Why Thread making insert removed by using alen key ? A4 : manual operation		After Implementation of pneumatic gun instead of alen key operator can easily remove the thread making insert and reduce rejection due to threading is			What To Do : Increased productivity & avoid rejection due to Improper threading						
					How To Do : Used pneumatic gun to removed the thread making insert						
Root Cause					Frequency :						
Thread making insert removed by using alen Key					Cost Incurred For Making Kaizen :						
Date : 25/05/2015					Material Cost		Labour Cost		Total
